

GLOBAL MEDICAL DESIGN & MANUFACTURING

END-TO-END AND EVERYTHING IN BETWEEN

Viant is here to help you expand your product offering, optimize your supply chain, and improve quality, while managing costs on a global scale. You can count on us to bring deep technical expertise, customer-centric program management, and a unique combination of OEM understanding and contract manufacturing know-how to every project we deliver.

- **A relentless focus on customers and operational excellence**
- **End-to-end solutions from design and development through manufacturing, assembly, and packaging**
- **Deep technical expertise and understanding of clinical applications**
- **Materials know-how with both metals and polymers, including highly specialized processes**
- **Lean principles throughout the product lifecycle including 3P**
- **Global resources, scale, and vertically integrated supply chain**
- **'In it for life' culture**

END-TO-END NETWORK THAT SCALES WITH YOU

We help you deliver your life-saving and life-enhancing medical device projects.

EXPERTISE YOU CAN COUNT ON

We challenge the status quo, making recommendations that we trust will improve your product, reduce costs or accelerate speed to market.

COMMITMENT TO EXCELLENCE

We are committed to Operational Excellence through continuous investment in robust systems and processes that ensure reliable, consistent performance.

OEM MEETS CM MINDSET

Our executive team has over 110 years of leadership experience across key medical device manufacturers. We understand what matters most to your business and customers.
